Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8,19-23,26-37, drawn to a method and apparatus for imaging tissue, classified in class 600, subclass 407.
- II. Claims 38-41, drawn to a system for recording on a recording medium the location of tissue sections through which a microscope images tissue, classified in class 359, subclass 368.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as examination of tissue cells obtained from a sample inside a patient and placed on a slide. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. LuKacher on May 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
